# WELLHEAD PROTECTION PROGRAM DOCUMENTATION

## Notification Letters

**Note - The City of Gold Bar is currently reviewing and may revise the attached notification letters. Figures 5-1 and 5-2 will be included with each notification.**

**LETTER A**  
**(To be sent to local and state agencies)**

Date

Washington Military Department  
Emergency Management Division  
Building 20 – Plans Section  
Camp Murray, Washington 98430-5122

Dear Sir/Madam:

As part of the wellhead protection program for the City of Gold Bar we are hereby informing you of the findings of our wellhead protection area delineation. This is in accordance with state regulations (WAC 246-290-135).

Our system has 610 service connections, and serves a population of approximately 2000 people. The State Department of Health has given one of our well sources a rating of "highly susceptible". This means that our drinking water supply is very vulnerable to contamination.

The enclosed map shows the 1, 5, and 10 year time of travel boundaries for our wellhead protection area. Any ground water contamination that occurs within this wellhead protection area has a high potential to reach our well. It is therefore of utmost importance to us that all reasonable steps be taken to ensure that land use activities within this area do not contaminate our customer's drinking water supplies.

Thank you for your support in protecting our drinking water.

Sincerely,

City of Gold Bar
